

I believe that this action taken by the FCC is a big step. This is all we need to break through and make a change. This is correct if the change is Communism. In my eyes America is the land of the rights, the land of choice, and most importantly the land of the FREE. We, the citizens of the United States of America, should have rights, have choices, and have freedom. This movement is doing nothing but taking away our rights as citizens, our choice as listeners, and our freedom to listen to what we want. How is this dignified? I understand that the FCC is in a tough spot right now with the NAB in a fearful spot but this country isn't about the companies that operate here. This country was made to for freedom, for choice and for RIGHTS! Taking away little stuff from Satillite radio doesn't seem like much but its what comes after that. Where to stop? I'll tell you where, Right where you are right now. I will leave you with this thought, how can you go against everything that our fore-fathers faught for? How can you control the citizens of the United States of America? This is the land of rights, the land of choice, and the land of the free and this shall always be true.
